

EWA District 9/AT&T West

Bargaining Bulletin #38

Tuesday, April 14, 2009

Your Committee met today in both formal session and in sub-committee. In the formal session we received 49 pages of responses to some of our questions. The company said they were “still working” on the rest of our previous questions. We made an additional information request. The company has still made no improvement in their previous proposals. The Premises Technician sub-committee met and continued to work on these very important issues.
